1 Documentation For Package MC

1.1 mc - Midnight Commander

1.1.1 Description

This package provides the program Midnight Commander, which is a free clone of the DOS tool Norton Commander. As a result, maintenance work becomes easier for fli4l maintainers not familiar with the command line. The program is started by executing the command 'mc' on the console.

1.1.2 Configuration

OPT_MC Specifying 'no' here deactivates OPT_MC completely.

To activate OPT_MC set OPT_MC to 'yes'.
