# 1 Documentation For Package MC

## 1.1 mc - Midnight Commander

### 1.1.1 Description

This package provides the program Midnight Commander, which is a free clone of the DOS tool Norton Commander. As a result, maintenance work becomes easier for fli4l maintainers not familiar with the command line. The program is started by executing the command 'mc' on the console.

### 1.1.2 Configuration

**OPT\_MC** Specifying 'no' here deactivates OPT\_MC completely.

To activate OPT\_MC set OPT\_MC to 'yes'.
